

Marketing Website

Complete Claude Code Build Prompt — Global, All Markets

Devs and Visuals · 2026 · Confidential

This document is the complete, exhaustive Claude Code build prompt for the OpesFlux global marketing website. It replaces the earlier UK-only version entirely. Every reference to UK-specific regulations, HMRC, MTD, Making Tax Digital, British compliance, and UK-only market positioning has been removed. The website now targets businesses worldwide — any country, any currency, any regulatory environment. Copy everything from Section 0 onwards and paste into Claude Code.

0. Project Brief

GLOBAL FIRST: This is a marketing website for a global product. Never mention any single country's tax authority, compliance framework, or regulatory body as the primary focus. Compliance features are presented as jurisdiction-configurable, not UK-specific. No country is the default.

You are building the official global marketing website for OpesFlux — an ERP and POS system from Devs and Visuals, built for businesses anywhere in the world. This is the public-facing marketing and blog site only. The actual product app lives separately at app.devsandvisuals.com.

Property	Value
Product name	OpesFlux
Tagline	Your Work Flow Companion
Brand promise	Run your business in flow.
Company	Devs and Visuals
Website URL	opesflux.devsandvisuals.com
App URL	app.devsandvisuals.com
Target market	Businesses globally — retail, hospitality, wholesale, construction, professional services, manufacturing
Business sizes	1 staff (sole trader) through 500+ staff (enterprise groups)
Supported jurisdictions	Global — configurable per company: UK, Pakistan, UAE, India, USA, Australia, Nigeria, Saudi Arabia, and more

1. Technology Stack (Non-Negotiable)

```
Framework:      Next.js 14 (App Router, NOT Pages Router)
Language:       TypeScript (strict mode)
Styling:        Tailwind CSS v3
UI:             shadcn/ui (latest)
Icons:          lucide-react
Animations:     Framer Motion 11+
Forms:          react-hook-form + zod
Blog/Content:   MDX with @next/mdx + gray-matter
Analytics:      Plausible Analytics (GDPR-friendly, no cookies required)
SEO:            next-seo + next-sitemap
Images:         next/image (sharp)
Fonts:          next/font (Inter from Google Fonts)
Deployment:     Vercel

Initialise:
pnpm create next-app@latest opesflux-web --typescript --tailwind --app --src-dir
```

2. Exact File Structure

3. Brand Design System

3.1 Colour tokens

```
:root {
  --color-deep:      #0A2540; /* primary text, brand */
  --color-deep-soft: #1A3556; /* hover on deep */
  --color-cyan:      #00C2FF; /* accent, flow, active */
  --color-cyan-soft: #66D9FF; /* hover on cyan */
  --color-cyan-glow: rgba(0,194,255,0.12);
  --color-white:     #FFFFFF;
  --color-cream:     #F8FAFC; /* section backgrounds */
  --color-mist:      #F1F5F9; /* card backgrounds */
  --color-border:    #E2E8F0;
  --color-muted:     #64748B; /* body text muted */
  --color-text:      #334155; /* body text */
  --color-success:   #10B981;
  --color-warning:   #F59E0B;
  --color-error:     #EF4444;
}
```

3.2 Typography

```
Font family: Inter (variable, weights 400-700) via next/font
Letter-spacing: -0.02em on all display headings
```

Display XL:	text-7xl	72px	leading-[1.05]	font-semibold	tracking-tight
Display L:	text-6xl	60px	leading-[1.1]	font-semibold	tracking-tight
H1:	text-4xl	36px	leading-tight	font-semibold	
H2:	text-3xl	30px	leading-tight	font-semibold	
H3:	text-2xl	24px	leading-snug	font-medium	
Body L:	text-lg	18px	leading-[1.7]		
Body M:	text-base	16px	leading-[1.7]	(default)	
Caption:	text-xs	12px	uppercase	tracking-wider	font-medium

3.3 Spacing, radius, animation

```
Container:      max-w-7xl mx-auto px-6 lg:px-8
Section padding: py-20 md:py-28 lg:py-32
Card radius:    rounded-2xl (16px)
Button radius:  rounded-lg (8px)
Default shadow: shadow-[0_4px_24px_rgba(10,37,64,0.08)]
Hover shadow:   shadow-[0_12px_40px_rgba(0,194,255,0.16)]

Animations (Framer Motion):
  Scroll fade-in: opacity 0->1, translateY 16px->0, duration 0.4s ease-out
```

Stagger children: 0.08s delay between siblings
Card hover lift: -translate-y-1 + shadow upgrade, duration-200
NEVER: spinning, bouncing, scale-pulse
Respect prefers-reduced-motion: disable all animations if set

4. Global Components

4.1 Header

- Sticky, 80px height, transparent by default
- On scroll >40px: white bg with backdrop-blur-lg, border-b border-border
- Left: OpesFlux logo (40px tall) linked to /
- Centre navigation links: Features · Industries (dropdown) · Pricing · Blog · About
- Right: 'Sign in' ghost button (app.devsandvisuals.com/login) + 'Book a demo' cyan primary (/contact)

Industries dropdown (hover + click triggered)

- 6 items: Retail, Restaurants, Wholesale, Construction, Manufacturing, Professional Services
- Each item: lucide icon + name + one-line description
- White background, rounded-2xl, shadow, p-4
- Hover state: cyan-soft background on each item

4.2 Footer

- Background: bg-[#0A2540] (dark navy)
- 5 columns: Brand (2-col wide), Product, Company, Resources, Legal
- Brand column: white logo, tagline 'Your Work Flow Companion', 2-sentence description, LinkedIn + X + YouTube social icons
- Product: Features, Pricing, Industries, Integrations, Changelog, Roadmap
- Company: About, Blog, Careers, Press, Contact, Partners
- Resources: Help Centre, API Docs, Status, Security, Privacy
- Legal: Privacy Policy, Terms, Cookies, Acceptable Use
- Bottom bar: copyright left, 'Built by Devs and Visuals' right

4.3 Cookie Banner

- Fixed bottom-right, max-w-420px, bg-white, rounded-2xl, shadow-xl
- Heading: 'We value your privacy'
- Text: one-line description of analytics cookie use
- Buttons: 'Accept all' (primary) + 'Decline' (ghost)
- Persist choice in localStorage key: 'cookieConsent'
- Do not load Plausible script until user accepts

5. Page-by-Page Specifications

5.1 Homepage (/)

Metadata

```
title: "OpesFlux — Run Your Business in Flow | Global ERP & POS"
description: "OpesFlux is the all-in-one ERP and POS platform for businesses worldwide.
              POS, inventory, accounting, payroll, and tax compliance in one
              system.
              Book a free demo today."
```

Section 1 — Hero (full viewport height, min 700px)

- Background: white with radial gradient cyan-glow at top-right, decorative FlowLines SVG (2 cyan curves, 8% opacity)
- LEFT (60%): Eyebrow 'Built for businesses worldwide' (text-cyan, uppercase), H1 'Run your business in flow.', subheading (max-w-xl, ~50 words explaining OpesFlux as a unified global platform), CTA row: 'Book a free demo' primary + 'See how it works' ghost, trust line: 'Trusted by businesses across retail, hospitality, wholesale, and construction'
- RIGHT (40%): DashboardMockup animated component — fake OpesFlux dashboard with live sales counter, inventory chart, recent orders, floating cyan data-pulse dots. Subtle hover-tilt on mousemove.

Section 2 — Trust Bar

- Full-width, py-12, bg-cream
- Centred text: 'Trusted by businesses across every industry and every continent'
- Row of 6 placeholder industry icons (grayscale default, full colour on hover): Store, Utensils, Truck, HardHat, Factory, Briefcase

Section 3 — Problem ('The cost of fragmented tools')

- 4-column stat cards (responsive 1/2/4 grid):
 - '12 hrs' — lost weekly to manual reconciliation
 - '34%' — of businesses cite stock errors as their #1 operational pain
 - '3+' — average separate tools a growing business juggles daily
 - '\$2,400' — estimated annual cost of data errors for a 10-person business

Use neutral stats and USD as default currency in the stat callouts. The stats should read as universally relevant, not country-specific.

Section 4 — Solution ('One platform. Every feature.')

- 6-card feature grid (1/2/3 columns):
- Point of Sale — icon: ShoppingCart
- Inventory Management — icon: Package
- Accounting & Finance — icon: Calculator
- Payroll & HR — icon: Users
- CRM & Customers — icon: Heart
- Reports & Analytics — icon: BarChart2
- Each card: cyan icon container, title, 2-sentence description, 'Learn more →' link

Section 5 — Industries Snapshot

- 6-card grid: Retail, Restaurants, Wholesale, Construction, Manufacturing, Professional Services
- Each card: icon, name, 2-line description, 3 bullet features, 'Explore →' link to /industries/[slug]

Section 6 — Global Compliance Callout

- Full-width, bg-[#0A2540] (dark navy)
- LEFT: Eyebrow 'Works wherever you operate', H2 'Built-in tax and payroll compliance for any jurisdiction.', body text explaining that OpesFlux adapts to each company's local tax rules, statutory deductions, and reporting requirements — whether they operate in the UK, Pakistan, UAE, India, USA, or anywhere else. No add-ons, no workarounds.
- RIGHT: 3 stat callout cards: '100+' countries supported, '10+' jurisdictions pre-configured, 'Zero' tax rule hardcoding — all rates stored in the database
- Compliance badges row: Multi-Currency, Multi-Jurisdiction, GDPR-Ready, Audit Trail

Section 7 — Testimonials Carousel (3 placeholder cards)

- Use Embla Carousel
- Each card: 5-star rating, quote (placeholder), avatar + name + role + country flag emoji
- Include a mix of countries in placeholders: e.g. UK, Pakistan, UAE

Section 8 — Final CTA

- H2: 'Ready to run your business in flow?'
- Subheading: 'Book a 20-minute walkthrough this week. We'll show you exactly what OpesFlux looks like for a business like yours — no pressure, no commitment.'
- Two CTAs: 'Book a free demo' (primary) + 'Talk to sales' (ghost)
- Below: 'Free 7-day trial after demo · No credit card required · Any currency' (text-xs text-muted)

5.2 Features Page (/features)

Metadata

```
title:      "Features — Everything Your Business Runs On | OpesFlux"
description: "OpesFlux features: POS, inventory, accounting, payroll, tax
compliance,
           CRM, and reporting. All in one platform. Works for any business in
any country."
```

- Hero: H1 'Every feature your business needs. Nothing you don't.'
- 6 alternating feature blocks (FeatureBlock component, left/right alternating):
 - 1. Point of Sale (#pos) — touch/barcode/offline/receipts/split payments
 - 2. Inventory & Stock (#inventory) — real-time/multi-location/batch/alerts
 - 3. Sales Orders & CRM (#sales) — orders/quotes/returns/customer ledger
 - 4. Purchasing & Suppliers (#purchasing) — POs/goods receipt/supplier ledger
 - 5. Finance & Accounting (#accounting) — invoicing/tax/double-entry/banking
 - 6. HR & Payroll (#payroll) — employees/payroll/timesheets/leave/pension
- Each block: eyebrow (cyan uppercase), H2, 100-word description, 4 bullet highlights, mockup placeholder, anchor link
- Final CTA: 'See it in action' → /contact

5.3 Pricing Page (/pricing)

Metadata

```
title:      "Pricing — Simple Plans for Any Business | OpesFlux"
description: "OpesFlux pricing: Starter from $49/month. Growth $129/month.
           Enterprise $299/month. Multi-currency. Cancel anytime."
```

Display prices in USD as the global default. Include a small note: 'Prices shown in USD. Local currency billing available.' Do not mention GBP as the primary currency anywhere.

- Hero: H1 'Simple pricing. Built for businesses of every size.' + monthly/annual toggle (annual saves 20%)

Pricing tiers (use from config/pricing.ts)

```
PRICING_TIERS = [
  {
    name: 'Starter',
    price: { monthly: 49, annual: 470 },
    currency: 'USD',
    note: 'Local currency billing available',
    users: 'Up to 3 users',
    locations: '1 location',
    description: 'Perfect for sole traders and small shops just getting started.',
  },
]
```

```

    features: [
      'Point of Sale', 'Inventory management', 'Invoicing & payments',
      'Customer profiles', 'Basic reports', 'PDF exports',
      'Tax management (jurisdiction configurable)', 'GDPR-ready tools',
      'Email support',
    ],
    bestFor: 'Corner shops, cafes, freelancers, market stalls',
  },
  {
    name: 'Growth',
    price: { monthly: 129, annual: 1238 },
    highlighted: true,
    badge: 'Most Popular',
    users: 'Up to 15 users',
    locations: 'Up to 5 locations',
    description: 'Everything growing teams need to scale across locations.',
    features: [
      'Everything in Starter',
      'Purchase orders & supplier management',
      'Multi-location stock & transfers',
      'Payroll, statutory deductions, auto-enrolment',
      'Sales returns & credit notes',
      'Timesheets & leave management',
      'CSV/Excel exports', 'Priority support',
    ],
    bestFor: 'Restaurant groups, regional retailers, distributors',
  },
  {
    name: 'Enterprise',
    price: { monthly: 299, annual: 2870 },
    users: 'Unlimited users',
    locations: 'Unlimited locations',
    description: 'Full platform with group reporting and dedicated support.',
    features: [
      'Everything in Growth',
      'Double-entry accounting',
      'Bank reconciliation & open banking',
      'Multi-company group P&L',
      'Multi-currency transactions',
      'Industry-specific compliance modules',
      'Customer self-service portal',
      'Dedicated account manager', 'Phone support',
    ],
    bestFor: 'Retail chains, holding groups, importers, large firms',
  },
];

```

- Full feature comparison table below cards
- FAQ accordion (10 questions — see Section 5.3.1)
- Final CTA: 'Not sure which plan? Book a free demo.'

5.3.1 FAQ questions for Pricing page

- Do I need to install anything?
- Can I switch plans later?
- What happens during the free trial?
- Is my data safe and backed up?
- Do you charge per location or per user?
- Can I pay in my local currency?
- What tax and payroll systems does OpesFlux support?
- How does the compliance module work for my country?
- Can I import data from another system?
- What's your cancellation policy?

5.4 Industry Pages (/industries/[slug])

Build 6 pages from a single template using config/industries.ts. Slugs: retail, restaurants, wholesale, construction, manufacturing, professional-services.

Industry page template layout

- Hero: industry-specific eyebrow, H1, subheading, primary CTA 'Book a demo for [industry] businesses'
- 'Common challenges' section: 4-card grid with industry-specific pain points
- 'Built for [industry]' features: 4 feature blocks with industry-specific use cases
- Industry stats callout: 2 globally-sourced statistics (not country-specific)
- Testimonial placeholder (mark 'Coming soon' until real)
- Final CTA: 'Book a [industry] demo'

All industry statistics must be globally sourced (e.g., 'globally, X% of retailers report...'). Do not reference UK-specific statistics, UK ONS data, or British industry bodies as primary sources.

5.5 Blog Index (/blog)

Metadata

```
title: "OpesFlux Insights – Practical Guides for Business Owners Worldwide"
description: "Practical guides on business management, payroll, inventory, tax compliance,
and growing your business efficiently – for any market, any industry."
```

- Hero: H1 'OpesFlux Insights', subheading

- Category filter tabs: All · Payroll & HR · Tax & Compliance · POS · Inventory · Finance · Growth
- Featured post (large card at top if frontmatter featured: true)
- Post grid: 3-col desktop / 2-col tablet / 1-col mobile, 12 posts per page
- Each BlogCard: cover image, tags (max 2), title (2-line clamp), excerpt (3-line clamp), author avatar + name + date + reading time
- Newsletter CTA band between rows 1 and 2
- 'Load more' pagination (12 per page)

5.6 Blog Post (/blog/[slug])

MDX frontmatter schema

```
---
title: "Managing Payroll Across Multiple Countries: A Complete Guide"
description: "How to handle multi-country payroll, tax compliance, and employee contributions when your business operates in more than one market."
date: "2026-05-01"
updated: "2026-05-15"
author:
  name: "Arif Khan"
  role: "Head of Product"
  avatar: "/team/arif.jpg"
coverImage: "/blog/multi-country-payroll.jpg"
coverImageAlt: "A world map with currency symbols"
tags: ["Payroll", "Global", "HR", "Compliance"]
category: "Payroll & HR"
featured: false
seoKeywords: ["global payroll", "multi-country payroll", "international HR"]
canonicalUrl: "https://opesflux.devsandvisuals.com/blog/multi-country-payroll"
ogImage: "/blog/multi-country-payroll-og.png"
---
```

Blog post layout

- Breadcrumb: Home > Blog > {Category} > {Title}
- Tags row (small cyan badges)
- H1 (Display M, max-w-3xl)
- Author byline: avatar, name, role, date, reading time
- Cover image: full-width, aspect-ratio 16:9, rounded-2xl, blur placeholder
- Article body: max-w-3xl mx-auto, Inter, body-L, leading-[1.8]
- Sticky Table of Contents (right sidebar, desktop): auto-generated H2/H3, active heading cyan, smooth scroll
- Share buttons: LinkedIn, X, Copy link, Email
- Related posts (3 cards): same category preferred, then same tags
- Newsletter CTA at bottom

- Reading progress bar: cyan, top of viewport

SEO per blog post

- <title>: post title + ' | OpesFlux'
- <meta description>: from frontmatter
- Canonical tag: full URL
- JSON-LD Article schema: headline, image, datePublished, dateModified, author, publisher
- Open Graph: og:title, og:description, og:image, og:type article, og:published_time
- Twitter card: summary_large_image
- Auto-added to sitemap.xml on build

5.7 About Page (/about)

- Hero: H1 'We built OpesFlux because businesses everywhere deserved better.'
- Story: 4 paragraphs about the founding story (placeholder)
- Values: 4 cards — Global-First, Modular by Design, Truly Unified, Customer-Led
- Team grid: placeholder member cards
- Parent company callout: 'OpesFlux is a product of Devs and Visuals — a software studio building tools that work the way real businesses do.'
- CTA: 'Join our journey'

5.8 Contact / Demo Page (/contact)

Left column — Form

- H2: 'Book a free demo'
- Subheading: '20 minutes, no pressure. We'll show you exactly what OpesFlux looks like for a business like yours.'

Form fields (react-hook-form + zod)

- Full name (required)
- Work email (required, email regex)
- Company name (required)
- Phone (optional)
- Country (required, searchable dropdown of all world countries)
- Industry (required, dropdown): Retail, Restaurants & Hospitality, Wholesale & Distribution, Construction, Manufacturing, Professional Services, Other
- Team size (required): 1–3, 4–10, 11–50, 51–200, 200+
- What are you hoping to solve? (optional, textarea, max 500 chars, character counter)
- How did you hear about us? (optional, select)

- Consent checkbox (required): GDPR-compliant wording
- Submit: POST to /api/contact (Next.js Route Handler → forwards to Resend/Formspre/Slack)
- On success: replace form with thank-you message + Calendly widget

Right column — Direct contact

- Email: hello@opesflux.devsandvisuals.com (with copy button)
- WhatsApp / Phone: (number)
- Calendly embed: direct booking widget
- Office: Devs and Visuals registered address

5.9 Case Studies (/case-studies and /case-studies/[slug])

- Index: 'Real businesses, real results' hero
- Filter tabs by industry
- 3 placeholder cards marked 'Coming soon'
- Individual page: 3-metric stats row, Challenge / Solution / Results body, pull quote, final CTA
- Placeholder case studies should represent global diversity — not UK-only examples

5.10 Privacy and Terms Pages

- Simple typography pages, max-w-3xl mx-auto
- Privacy sections: Who we are, What we collect, How we use it, Retention, Your rights (GDPR + global equivalents), Cookies, Third parties, Changes, Contact
- Terms: placeholder legal content

5.11 404 Page

- Big '404' in Display XL with cyan colour
- H2: 'This page took a wrong turn'
- Subheading: 'Let's get you back to flow.'
- Primary CTA: 'Go home' (/), secondary: search box
- 4 popular page link cards below

6. SEO Requirements (Non-Negotiable)

6.1 Technical SEO

```
// sitemap.ts - auto-generates /sitemap.xml
export default async function sitemap(): Promise<MetadataRoute.Sitemap> {
  const base = 'https://opesflux.devsandvisuals.com';
  const posts = await getAllPosts();
  const industries = ['retail', 'restaurants', 'wholesale', 'construction',
    'manufacturing', 'professional-services'];

  return [
    { url: base, priority: 1, changeFrequency: 'weekly' },
    { url: `${base}/features`, priority: 0.9 },
    { url: `${base}/pricing`, priority: 0.9 },
    { url: `${base}/blog`, priority: 0.8 },
    { url: `${base}/about`, priority: 0.7 },
    { url: `${base}/contact`, priority: 0.6 },
    ...industries.map(s => ({ url: `${base}/industries/${s}`, priority: 0.8 })),
    ...posts.map(p => ({ url: `${base}/blog/${p.slug}`, priority: 0.7,
      lastModified: new Date(p.updated || p.date) })),
  ];
}

// robots.ts
export default function robots() {
  return { rules: [{ userAgent: '*', allow: '/', disallow: ['/api/'] }],
    sitemap: 'https://opesflux.devsandvisuals.com/sitemap.xml' };
}
```

6.2 Per-page metadata pattern

```
export const metadata: Metadata = {
  title: 'Page Title | OpesFlux',
  description: 'Under 160 chars, includes primary keyword.',
  openGraph: {
    title: 'Page Title | OpesFlux',
    description: 'Same as above',
    url: 'https://opesflux.devsandvisuals.com/this-page',
    siteName: 'OpesFlux',
    images: [{ url: '/og-default.png', width: 1200, height: 630 }],
    locale: 'en_US',
    type: 'website',
  },
  twitter: { card: 'summary_large_image', title: '...', images: ['/og-default.png'] },
  alternates: { canonical: 'https://opesflux.devsandvisuals.com/this-page' },
};
```

6.3 JSON-LD schemas

```
// Root layout - Organization schema:
{
  '@context': 'https://schema.org',
  '@type': 'Organization',
  'name': 'OpesFlux',
  'url': 'https://opesflux.devsandvisuals.com',
  'logo': 'https://opesflux.devsandvisuals.com/logo.svg',
  'sameAs': ['https://linkedin.com/company/opesflux'],
  'parentOrganization': { '@type': 'Organization', 'name': 'Devs and Visuals' }
}

// Homepage - SoftwareApplication schema:
{
  '@type': 'SoftwareApplication',
  'name': 'OpesFlux',
  'applicationCategory': 'BusinessApplication',
  'operatingSystem': 'Web',
  'offers': { '@type': 'Offer', 'price': '49', 'priceCurrency': 'USD' },
  'availableLanguage': 'en'
}

// Pricing page - FAQPage schema for the accordion
// Blog posts - Article schema with all required fields
```

6.4 Performance targets

Metric	Target
Lighthouse Performance	90+ (mobile)
Lighthouse SEO	100
Lighthouse Accessibility	95+
Lighthouse Best Practices	100
LCP	< 2.5s
INP	< 200ms
CLS	< 0.1

7. Blog Workflow for Marketing Team

The marketing team must be able to publish blog posts without touching code. Here is the exact workflow:

- Create a new file: `src/content/blog/your-post-slug.mdx`
- Add frontmatter at the top (copy from template in Section 5.6)
- Write post body in Markdown below the frontmatter
- Drop cover image in `/public/blog/your-post-slug-cover.jpg` (1200x630)
- Commit and push to GitHub: `git add . && git commit -m 'Publish: post title' && git push`
- Vercel auto-deploys in 60 seconds — post is live

If the marketing team is non-technical, integrate Sanity.io (recommended) or Contentful as a headless CMS. Both have Next.js integrations and provide a visual editor. Sanity free tier is sufficient for the blog volume expected in Year 1.

7.1 Supported Markdown features in MDX

- Headings: `## H2`, `### H3` (never use `H1` — the title is the `H1`)
- Bold, italic, links, images, code blocks, blockquotes, tables
- Custom components available in MDX: `<CalloutBox>`, `<TwoColumn>`, `<StatCard>`
- Reading time auto-calculated from word count

8. Analytics & Tracking

8.1 Plausible Analytics (primary)

```
// Add to root layout after cookie consent:
<Script
  defer
  data-domain='opesflux.devsandvisuals.com'
  src='https://plausible.io/js/script.js'
/>

// Custom event tracking (lib/analytics.ts):
export function trackEvent(name: string, props?: Record<string, any>) {
  if (typeof window !== 'undefined' && (window as any).plausible) {
    (window as any).plausible(name, { props });
  }
}
```

8.2 Events to track

Event name	Properties
Demo Form Submitted	industry, team_size, country
Pricing CTA Clicked	plan, billing_cycle
Blog Post Read	slug, reading_time, category
Newsletter Signup	source_page
Industry Page Viewed	industry
External Link Click	destination
Contact Form Started	source_page

8.3 Google Search Console

- Verify site immediately after domain is configured
- Submit /sitemap.xml to Search Console
- Monitor Core Web Vitals report weekly for first month

9. Environment Variables

```
# .env.local
NEXT_PUBLIC_SITE_URL=https://opesflux.devsandvisuals.com
NEXT_PUBLIC_APP_URL=https://app.devsandvisuals.com

# Analytics
NEXT_PUBLIC_PLAUSIBLE_DOMAIN=opesflux.devsandvisuals.com
NEXT_PUBLIC_GA_ID=G-XXXXXXXXXX

# Forms
RESEND_API_KEY=re_xxx
CONTACT_EMAIL_TO=hello@opesflux.devsandvisuals.com
SLACK_WEBHOOK_URL=https://hooks.slack.com/...

# Calendly
NEXT_PUBLIC_CALENDLY_URL=https://calendly.com/opesflux/demo
```

10. Deployment (Vercel)

- Push code to GitHub
- Import repo at vercel.com → New Project
- Framework preset: Next.js (auto-detected)
- Add all environment variables
- Add custom domain: opesflux.devsandvisuals.com
- DNS: CNAME record, name: [opesflux](https://opesflux.devsandvisuals.com), value: cname.vercel-dns.com
- HTTPS enforced automatically
- Preview deployments on every branch push
- Verify Lighthouse scores on production URL before launch

11. Acceptance Checklist

Every item must be verified before marking the build complete.

PAGES BUILT

- Homepage with all 8 sections
- Features page with 6 alternating feature blocks
- Pricing page with 3 tiers, comparison table, FAQ accordion
- 6 industry pages (retail, restaurants, wholesale, construction, manufacturing, professional-services)
- Blog index with featured post, category filters, post grid, newsletter CTA
- Blog post template with TOC, share buttons, related posts
- About page with story, values, team
- Contact page with form (including country dropdown) + Calendly + direct contact
- Case studies index and template
- Privacy and Terms pages
- Custom 404 page

GLOBAL COMPLIANCE — VERIFY THESE SPECIFICALLY

These are the most important items to verify. The original UK-only version must be completely replaced.

- NO mention of 'UK businesses' as the target audience anywhere on the site
- NO mention of HMRC, Making Tax Digital, MTD, or UK-specific regulatory bodies as primary selling points
- NO mention of GBP (£) as the primary or default currency — USD is the default, with 'local currency available' note
- NO 'Built for UK businesses' or 'UK-first' language anywhere
- Hero H1 'Run your business in flow.' — no country qualifier
- Trust bar: 'Trusted by businesses across every industry and every continent'
- Compliance callout: references global jurisdictions (UK, Pakistan, UAE, India, USA) as examples, not UK only
- Contact form includes a 'Country' dropdown (all world countries, not just UK)
- Pricing displayed in USD with 'local currency billing available' note
- Case study placeholders reference businesses in multiple countries
- Blog post examples are globally relevant (not UK tax guides as primary content)
- Meta descriptions and SEO titles contain no UK-specific geographic qualifiers
- No UK flag emoji or flag references in the UI

CONTENT & SEO

- At least 3 example MDX blog posts created with global-relevance topics
- All placeholder copy filled in (no Lorem ipsum)
- All images have descriptive alt text
- Logo files in /public (SVG and white variant)
- Default OG image (1200x630) in /public
- /sitemap.xml generates and includes all pages
- /robots.txt configured correctly
- Every page has unique title and description
- Organization JSON-LD in root layout
- Article JSON-LD on every blog post
- FAQ JSON-LD on pricing page
- Open Graph tags on every page
- Canonical URLs on every page

PERFORMANCE & QUALITY

- Lighthouse Performance ≥ 90 (mobile)
- Lighthouse SEO = 100
- Lighthouse Accessibility ≥ 95
- All images use next/image with dimensions
- Hero font preloaded
- No render-blocking resources
- No horizontal scroll on any viewport (320px to 1920px)
- Touch targets minimum 44x44px on mobile
- Keyboard navigation works on all interactive elements
- Visible focus rings throughout
- Reduced-motion preference respected (disable scroll animations)

FUNCTIONALITY

- Mobile menu opens and closes
- Industries dropdown works on hover and click
- Pricing toggle updates prices (monthly / annual)
- FAQ accordion expands and collapses
- Contact form validates and submits (including country field)
- Newsletter form submits
- Cookie banner appears once and persists choice
- Blog category filter tabs filter posts client-side

- Blog 'Load more' pagination works
- Share buttons work on blog posts
- Sticky TOC tracks active heading on scroll

DEPLOYMENT

- Custom domain configured and resolving
- HTTPS enforced
- All environment variables set in Vercel
- Plausible Analytics installed and receiving events
- Google Search Console verified
- Sitemap submitted to Search Console
- Contact form tested in production (email arrives)
- Favicons showing correctly on all platforms
